This checklist is comprised of 240 species of birds that have been identified at Saint John's Arboretum. Use the seasonal ease of viewing codes to help you gauge when you'd be more likely to see different species while birding at Saint John's.

Visit our web site for more information:  
<http://www.csbsju.edu/arboretum>

C = Common: Regularly present, easy to find and see in appropriate habitat at Saint John's.  
 U = Uncommon: Regularly present in small numbers, less easy to find and see at Saint John's.  
 O = Occasional: Irregularly present, a year or two may elapse between sightings at Saint John's.  
 R = Rare: Has occurred at least once at Saint John's (Outside of normal range).

Saint John's Arboretum encompasses the lakes, prairie, oak savannah, and woodland in the 2,740 acres surrounding Saint John's Abbey and University. The Arboretum strives to celebrate and preserve the unique beauty and richness of God's creation in central Minnesota and fosters the Benedictine tradition of land stewardship, education and environmental respect.
