WEBSTER & PIN code information

Your **WSC code** is the code you use in addition to your SSN to access your records through WEBSTER. This code is used when you first access WEBSTER and is valid for your entire academic career at CSB / SJU. You may change this code to something easy for you to remember once you have signed into WEBSTER.

You receive a **registration PIN** each semester through your advisor which is used to register for classes and to drop or add through the 4th day of classes during that semester only. This code is separate from your WSC code and is used only for the purpose of registration.

See your advisor early!

If you are signing up for a variable credit course, please be sure to enter the credit amount you wish to receive for the course.

Course Descriptions:

ART 200-01A: Environmental Art & Architecture

Instructor: Richard Bresnahan

This course focuses on a range of issues addressing art, architecture and their relationship to a sustainable environment. Through an analysis of critical theory, students will gain an understanding of the language and critical issues of art, architecture and their impact upon the environment. Through a hands-on approach, students will apply these concepts to make ceramic artwork in the SJU Pottery studio. Students will critically analyze readings, discuss examples of art and architecture and meet with artists in order to expand their understanding of the relationship between art, architecture and the environment.

Grading: A-F only

BIOL 374-01A: Biological Techniques, An Introduction to Aerobiology: A Study of Airborne Pollen & Spores in Central Minnesota 1 credit; *does not count toward the Biology major*

Instructor – Steve Saupe (for more info - x2782; ssaupe@csbsju.edu)

During the spring semester, the Biology Department will offer a mini-course on the biology of pollen and spores. This course will be taught in a workshop format and will meet in the classroom/lab about 6 times at the beginning of the term to learn about airborne allergens, pollen and spore biology, and how to measure/monitor pollen in the air using a Rotorod Sampler. Participants will be required to: (1) attend all class sessions; (2) make one pollen/mold count per week; (3) help maintain our web site; and (4) prepare a profile of one type of pollen or mold spore. To learn more about pollen research work at CSB/SJU, check out our website (The Center for Pollen Studies; www.csbsju.edu/biology/pollen) or contact Dr. Saupe (x2782; ssaupe@csbsju.edu).

Prerequisites: BIOL 115 & BIOL 116

Topics:

- Pollen: Structure, Function, Development
- Pollination
- Pollen Morphology & Identification
- Spores: Structure, Function, Development
- Spore Morphology & Identification
- Aerobiology/Allergan Primer
- Sampling techniques: Rotorod sampler

Requirements:

- Attendance and full participation in all classes
- Collect and analyze one pollen/mold sample per week
- Prepare a web page summary of one pollen/spore type

Grading: S/U grading only

CORE 368-01A: Reading Biblical Women

This course is cross-listed with MCLT 365

An exploration of the Bible as sacred text, cultural document and literary masterpiece, with special attention to the women of scripture. In addition to close readings of texts such as Genesis, Exodus, The Song of Songs, the Gospels and Revelation, class members will become acquainted with a range of techniques of biblical and literary analysis, from historical and textual criticism to mysticism and feminist theory. In the final unit of the course, students will explore, as interpreters and creators, artistic responses to scripture (the study or creation of translation, stained-glass, theatre, poetry, mystical writings, prose fiction, etc., based on the biblical text).

Make sure you have met all prerequisites before attempting to register for a course. If you fulfilled the prerequisite through a course taken at another college, please contact the Registrar's Office prior to registration.

Course Descriptions cont'd:

CORE 368-01A: Origins of Evil (JC)

Instructor: Andreas Kiryakakis

The discussion surrounding the "problem of evil" in the Judeo-Christian tradition generally focuses on the following questions: Is it possible to believe in an all-loving and all-powerful God who guides and arranges our lives when such horrible evil and suffering exists in the world? Why did God not eliminate all of this agony and suffering? Why did God not create a better world in the first place? Can we still affirm divine justice in spite of all the suffering in the world? Within the framework of these and other questions, we will examine the ideas and theoretical foundations that make up the "problem of evil." We will study representative works by theologians, philosophers, writers and artists, in order to determine the limits and the validity of their positions. The primary aim of this class is not to determine whether the actions of God are right or wrong, but to examine and clarify the methods used by scholars and how these individuals fit within the precepts of various religious orders and schools of thought.

To make this course exciting and stimulating, we will read short selections from such works as Hans Schwartz, Evil: A Historical and Theological Perspective; Elaine Pagels, The Origins of Satan; Mark Twain, Letters from the Earth; Ute Ranke-Heinemann, Eunuchs for the Kingdom of Heaven; Saint Augustine, Confessions; Saint Thomas, A Summa of the Summa; Herman Hesse, Demian; Maimonides, The Guide for the Perplexed; Friedrich Nietzsche, Zarathustra; The Bible. We will also look at several art works and view excerpts from films.

CORE 390-13A: Senior Seminar: Being Good and Being Happy

Instructor: David Cloutier

What is a good life for a human being? If you are "good", are you "happy"? And what is true happiness? This course is designed to engage us collectively in discovering substantive and consistent answers to these questions, which underlie all particular moral questions. We will survey a wide variety of thinkers who have tried to answer these questions throughout history, as well as use novels, videos, and personal narratives to ask these questions about concrete human lives in particular circumstances.

CORE 390-15A: Senior Seminar: The Value of Intellectual Property in a Technological Age

Instructor: James Schnepf

Advances in technology strain ethical and legal views of intellectual property in areas such as copyrights and patents. By studying models for ethical decisions and behavior, the basis for property rights, and the history of intellectual property, we will work to develop a framework for viewing intellectual property in light of these technological changes. The discussions will reflect on both the ethics of personal action as well as societal action.

ENVR 200-01A: Environmental Art & Architecture - description under ART 200 cross-listing

Instructor: Richard Bresnahan

This course focuses on a range of issues addressing art, architecture and their relationship to a sustainable environment. HIST 117-01A: History of South Asia since 1500

Instructor: Purnima Dhavan

This class will trace the history of South Asia from the rise of the Mughal Empire to the advent and decline of the British Empire in South Asia. Important themes include the development of Islamic institutions, international trading networks, and the effects of colonial ideology on the social, political, and religious institutions of South Asia during this period. We will explore the ways in which concepts of religion, gender, nationhood, and identity evolved and changed during this time. In particular, the latter half of this class will examine the process by which the three modern nation-states of India, Pakistan, and Bangladesh were created.

MGMT 389-01A: SA Experiential Learning

Instructors: Wendy Klepetar & Virginia Arthur

This course is designed for students participating in Study Abroad. Reading relevant to understanding business in the international environment will be assigned. Students will write a series of essay integrating their knowledge of theory with their personal observations and reactions. Particular emphasis will be placed on the impact of culture on business. Miscellaneous:

Numerous last minute changes were made to the schedule & unfortunately, updates to the Table of Contents were overlooked. New course descriptions are on pages 7- 13, Verification of Major/Minor on page 14, Core Curriculum Requirements on page 15, Core Curriculum Designated Courses & Flags on page 16, Course Listings on pages 17-41, Proposed Summer 2004 Course Listings on page 42.

On page 7 of the course descriptions, the Communications department has requested the removal of the prerequisite of COMM or COMM 103.

On page 11 of the course listings, Jane Opitz should be listed as chairperson for CORE 101 (First Year Symposium) instead of Noreen Herzfeld.

COLG 280: Politics and Society in Cuba, 2 credits

Faculty Moderator - Gary Prevost

Dates: To be announced

Grading: A-F

Study in Cuba provides a unique opportunity to learn about a nation's past and present. It remains a mystery to many and hostile relations between the governments of the United States and Cuba have sharply limited contact between the two countries for almost forty years. Current U.S. law still restricts the travel of U.S. citizens to the island nation. This course, however, will obtain legal permission to be in Cuba, providing a unique opportunity to study Cuban history and the political and economic system of one of the world's few remaining socialist countries. The course involves visiting five of Cuba's major cities, including ten days in the capital, Havana. Students do reading on the historic background of the area under study and then focus on contemporary political, social, and economic issues through meetings with resource people: professors, political and religion leaders, and grass roots organizers. The course will be conducted in English but knowledge of Spanish will definitely enhance appreciation of our stay in Cuba and study of Cuban history, politics, and society.

Approximate Fee for trip: \$2,550 plus meals & Cuba Departure Tax of \$20

COLG 280: Benedictine Roots in Germany, 2 credits

Faculty Moderator - Vicky McIntyre

Dates: To be announced

Bavaria, the Silicon Valley of Germany, has a rich history and culture that influences business today. This course will investigate historical events that formed world opinion of what Germany is in the locations in which they took place. We will explore the Romantic Road, the monarchy of King Ludwig II, WWII concentration camps, and Hitler's impact. We will also study important factors in the development of the German economy. Several perspectives on German culture will be introduced, including an exposure to architecture from the Baroque to the Rococo, Mozart's music, and Albrecht Durer's engravings. We will return to our roots with a visit to the original Benedictine Monastery in Eichstatt from which our sponsoring order migrated to Minnesota.

Approximate Fee for trip: To be announced

PCST 368: Introduction to East Africa, 2 credits

Faculty Moderator - Ron Pagnucco

Dates: May 14 through June 15

East Africa is rich in history and social, cultural and environmental diversity. Through readings, lectures, discussions, field trips and presentations, we will explore the social, cultural, economic, political and religious aspects of East African societies, past and present, with a special focus on Kenya. We will also examine some of the important issues facing East Africa today. There are no prerequisite courses. This is a social science course and is open to any major.
