ART 200-01A: Environmental Art & Architecture

Instructor: Richard Bresnahan

This course focuses on a range of issues addressing art, architecture and their relationship to a sustainable environment. Through an analysis of critical theory, students will gain an understanding of the language and critical issues of art, architecture and their impact upon the environment. Through a hands-on approach, students will apply these concepts to make ceramic artwork in the SJU Pottery studio. By using all native materials, designing through a programmatic structure of indigenous systems, in a sustainable framework the student will parallel architectural and design schematics presented in theory and research to an applied reality. Students will critically analyze readings, discuss examples of art and architecture and meet with artists in order to expand their understanding of the relationship between art, architecture and the environment.

Grading: A-F only

Additional course for GWST minor:

Call #11348: CORE 365-02A *American Religious Culture (JC)*

NRSB 340: Pharmacotherapeutics, 4 credits (WebCT course)

Faculty Moderator - Ellie Ellickson & Laura Horn

This course provides a basic theoretical framework for pharmacodynamics and pharmacokinetics and their application to nursing. The content focuses on nursing implications relevant to pharmacology, including application across diverse populations, elements of clinical decision making, safe nursing practice, and establishing and monitoring client outcomes. A-F grading only.

Prerequisites: 110, 112, 207

NRSB 397: Student Nurse Internship, 2 credits

Faculty Moderator - TBA

Student must complete an application for internship form in order to be registered.

This course provides clinically-based learning opportunities to encourage application of theory and research based knowledge in clinical practice. Students will engage in experiences to enhance the development of their professional nursing role.

Course Objectives:

During this internship the student will:

Utilize the nursing process to provide safe patient care.

Enhance prioritization, organization and time management skills in the delivery of nursing care.

Report assessments and collected data in a timely manner to the appropriate clinical site staff.

Document patient care provided accurately and completely and consistent with clinical site protocols.

Enhance communication skills with patients, families, coworkers, and other members of the health care team.

Demonstrate accountability for nursing actions consistent with professional standards.

Demonstrate accountability for personal and professional development.

Prerequisites: Completed junior year of a baccalaureate nursing program and accepted into an approved clinical internship program.
