Doulas provide physical, informational and emotional support to families before, during and after birth. Their presence improves birth outcomes, reduces infant mortality, and offers critical emotional care that supports reproductive health. Doulas have been suggested as a way to reduce these inequities. Based on interviews with 60 doulas across the United States, this research demonstrates how doulas see their role in promoting health equity, the impact doulas can make on maternal health outcomes, and the limits to what doula care can do. *See the email sent by Academic Affairs on 9/5/23 for more information.*
