

Saint John's Arboretum Presents

Water Wonders

Water is a precious resource that we all need to live...

So where exactly does the water in our faucets come from?

What are some main uses of our local water?

How can you help keep our water clean?

**Saint John's Arboretum wants to come to your library
to help answer these questions and more with
games, books, and activities!**

Water Wonders is a one-hour program geared towards children ages 6-12. Hands-on activities and materials included. Program available June 14 - August 13, 2010

For more information, prices, and scheduling, please contact:
