Campus Compost

- Backyard composting reduces landfill waste and greenhouse gas emissions while producing rich soil to use in campus greenhouses.

- Contribute to the program by collecting compostable food scraps in your campus location using a container provided by Sustainability Office (visit us to get one!)

- Follow our strict guidelines to compost only foods listed for our system.

- Avoid contamination from prohibited food.

- As necessary, empty your compost container at your local compost bin near the dumpsters (see map).

- Grounds Dept will empty bins as necessary into campus compost pile for further processing and use by the Sustainability team.

Thanks for your partnership!

Compost bins located near select dumpsters on campus

Compost disposal bins (3) located next to dumpsters @ Seton Village apartments, Vincent Court apartments, and Virgil Michael/Placid Houses
