Securian Financial
400 Robert Street N
St. Paul, MN 55101

Dear Hiring Manager,

I am writing to apply for the Actuarial Intern position available at Securian Financial. I learned of this opportunity through Joe Kennedy at Securian Financial and he suggested I apply for the position. I am confident that my educational background in mathematics coupled with my diverse national and international team experience make me an excellent candidate.

I am currently enrolled at Saint John's University with a major in mathematics and a minor in accounting and will be studying for and taking the first Actuarial exam in the fall. In addition, I have also had various employment experiences including working as a Math Tutor for undergraduate students at all levels, and as an Army Transportation Coordinator, where I purchased equipment for vehicles and reported finance documents by utilizing Excel and Word documents along with other computer software. The coordinator role in the U. S. Army provided an opportunity to work with a variety of people from different departments. My sense of responsibility and attention to detail was further developed in the management of various projects. Also, as a squad leader in the army, I enhanced my leadership skills by leading my squad members and working with them as a team. This experience augmented my ability to work with a groups of people and manage multiple projects in time-sensitive situations.

The Actuarial internship offered at Securian Financial is a wonderful program for those who are interested in product development, actuarial valuation, finance, and risk management. I am particularly excited about the actuarial component and feel that my background in mathematics and accounting would further enhance the productivity of the department.

I have attached a copy of my resume for your review. I look forward to being able to meet with you to further explore the contributions I could make at Securian Financial. Thank you for your time and consideration.

Sincerely,

Christopher Wright
